

Filtering is strange? Currently this is not an RC filter.

Mosfet symbol is strange, I don't know what each pin is.

What is Bat1 for, or J2?

TX1/RX1 or 0 for FTDI? I think 0

EN on voltage regulator not pulled high, you get no system power.

No I2C pullups

Pin 5,6 D/C

Pin 7,8 D/C

Bad naming convention

Missing LED resistor values
